IDENTIFIERS	*State University of New York; SUNY

ABSTRACT

This report presents data concerning applications, acceptances, and new enrollments in all graduate programs of the State University of New York for the spring 1973, summer 1973, and fall 1973 terms. Regarding masters admissions it was found that: (1) there were 22,237 applications for masters degree programs in 1973, up 313 or 1.4 percent; (2) acceptance rates for these applications varied widely from 20 percent to 92 percent, with an average of 64 percent of the applications given favorable decisions, compared to 62 percent in 1972; (3) the number of full-time and part-time masters degree students who actually enrolled was considerably less than the number of applications accepted by state university institutions. Statistics concerning doctoral admissions indicated that: (1) applications for doctoral degree programs and graduate certificate programs in 1973 totaled 11,939; (2) acceptance rates for these applications varied from 16 percent to 100 percent, with an average of 42 percent of the applications being accepted; (3) the number of full-time and part-time doctoral degree and graduate certificate students who actually enrolled was considerably less than the number of applications accepted by the state university institutions. Additional findings cover the masters, doctoral, first-professional degree admissions, and trends in graduate admissions data. (MJM)

GRADUATE STUDENT ADMISSIONS SURVEY, 1973

INTRODUCTION

1973 marks the fourth year of a state-wide graduate admissions data-collection effort. Again this year the Central Staff Office of Institutional Research has summarized the State University of New York portion of the responses to the survey. The current report covers applications, acceptances and new enrollments in all graduate programs for the Spring 1973, Summer 1973, and Fall 1973 term.

Because of the nature of the graduate admissions process, the enrollment data reported here should be used only in the context of this report. For example, only students who have been formally accepted into a graduate program during 1973 are included here. Graduate students admitted to their programs prior to the Spring 1973 term and all non-degree graduate students are not included in any of the enrollment figures in this report.

The 1970 report on State University graduate admissions covered only the fall term experience and consequently the data in this report is comparable only with that of the 1971 and 1972 reports. Comparisons based on just three years of data should be made with caution, especially in an area such as graduate admissions which is subject to long-term planning by both institutions and students. Nevertheless, in specific cases such comparisons may indicate changes in admission policies, programs, or student interests and goals. In addition, those colleges which have experienced an unexplained increase or decrease in either applications or subsequent enrollments may find the data reported here for similar institutions helpful in analyzing the causes.

This study posed difficult problems to those who were asked to provide the data. Graduate applications may not always be formal, but can be the result of professor-to-professor communications and a central source of information on applications and acceptances seldom exists. The campus persons who compiled the data deserve appreciation for making the report possible.

SUMMARY NOTES

Because the first-professional programs (M.D., D.D.S., D.V.M., O.D., J.D., and Pharm.D.), masters, and doctoral programs are quite different in their nature and their admissions patterns, they will be discussed separately.

Masters admissions

There were 22,237 applications for masters degree programs in 1973, up 313 or 1.4 percent. The University Centers received 10,723 (48 percent), the University Colleges received 9,086 (41 percent), and the remaining 11 percent were received by other senior institutions. This distribution was unchanged since 1972.

Acceptance rates for these applications varied widely from 20 percent to 92 percent, with an average of 64 percent of the applications given favorable decisions (see Table 2), compared to 62 percent in 1972. The application acceptance rates for each type of institution are as follows: University Centers, 63 percent; University Colleges, 73 percent; Health Sciences Centers, 32 percent, Specialized Colleges, 73 percent; and Statutory Colleges, 40 percent.

The number of full-time and part-time masters degree students who actually enrolled (8,493) was considerably less than the number of applications accepted by State University institutions (see Table 3). There are two major reasons for this drop: (1) students are likely to file more than one application, and in the absence of a centralized admissions system for graduate students, the number of unduplicated applicants cannot be identified; and (2) plans for attending graduate school may change, so that the student may not continue his education or may enroll in an institution outside the State University of New York.

The enrollment rates of accepted applicants at each institution vary, from 35 percent to 100 percent (see Table 3). The average percent of enrollment compared to accepted applications was 59 percent; and by institution type the averages were as follows: University Centers, 53 percent; University Colleges, 65 percent; Health Sciences Centers, 69 percent, Specialized Colleges, 66 percent; and Statutory Colleges, 69 percent.

The "yield" of applications in terms of actual enrollments varied from 17 percent to 79 percent (see Table 4). The average percent yeild was 38 percent, and by institution type as follows: University Centers, 33 percent; University Colleges, 47 percent; Health Sciences Centers, 22 percent; Specialized Colleges, 48 percent; and Statutory Colleges, 28 percent.

Doctoral admissions

Applications for doctoral degree programs and graduate certificate programs in 1973 totaled 11,939. The University Centers received 9,264 (76 percent), University Colleges received 424 (4 percent), Health Sciences Centers received 787 (7 percent), College of Environmental Science and Forestry received 71 (1 percent), and the Statutory Colleges received 1,393 (12 percent).

Acceptance rates for these applications varied from 16 percent to 100 percent, with an average of 42 percent of the applications being accepted (see Table 2). The application acceptance rates for each type of institution are as follows: University Centers, 43 percent; University Colleges, 80 percent; Health Sciences Centers, 27 percent; the College of Environmental Science and Forestry, 80 percent; and the Statutory Colleges, 28 percent.

The number of full-time and part-time doctoral degree and graduate certificate students who actually enrolled (2,259) was considerably less than the number of applications accepted by State University institutions, for the same reasons as discussed above for masters students. The enrollment rates of accepted applications varied from 19 percent to 100 percent (see Table 3). The average for all institutions was 45 percent, and by institution type the averages were: University Centers, 46 percent; University Colleges, 44 percent; Health Sciences Centers, 50 percent; College of Environmental Science and Forestry, 19 percent; and Statutory Colleges, 47 percent.

The "yield" of applications in terms of actual enrollments varied from 12 percent to 90 percent (see Table 4). The average percent yield was 19 percent, and by institution type as follows: University Centers, 20 percent; University Colleges, 35 percent; Health Sciences Centers, 14 percent; Specialized Colleges, 16 percent; and Statutory Colleges, 14 percent.

First-professional degree admissions

Considerably different rates of acceptance and enrollment are found for the first-professional graduate programs, necessitating a separate summary:

1. Law (J.D.):

   The only State University institution with a Law School is the University Center at Buffalo. There were 2,075 applications filed for the Law program, and 825 were accepted (40 percent). 321 of the accepted applicants enrolled as students (39 percent).

2. Medicine, Dentistry and Pharmacy (M.D., D.D.S., Pharm. D.):

   All four Health Sciences Centers enrolled M.D. and D.D.S. students in 1973, but only the Health Sciences Centers at Buffalo and Stony Brook

had a Dentistry program, and only the Buffalo Health Sciences Center had a Doctor of Pharmacy program. These data do not permit a separate analysis for Dentistry students.

There were 22,645 applications for these programs, 1,221 positive decisions (5 percent), and 676 enrolled students (55 percent of the accepted applications). The greatest application pressure was at the Stony Brook Health Sciences Center, where only 2 percent of the applications were accepted.

There were no startling differences between the enrollment rate of accepted applicants at each of the Health Sciences Centers. Downstate Medical Center reported 42 percent; Upstate Medical Center, 61 percent; Stony Brook, 59 percent; and Buffalo, 73 percent. It must be noted that the figures for Buffalo included applications and enrollments of the Dentistry and Pharmacy program and the figures for Stony Brook included Dentistry.

3. Optometry (O.D.):

The State College of Optometry offers the only professional Optometry program within the State University. This program received 397 applications and accepted 33 (8 percent). Of these, 25 students enrolled (76 percent).

4. Veterinary Medicine (D.V.M.):

Only the New York State Veterinary College at Cornell University has a program of Veterinary Medicine. This program received 655 applications and accepted 65 (10 percent). All of the accepted students enrolled.

The "yield" of applications in terms of actual enrollments varied from 1 percent to 16 percent (see Table 4). The average percent yield was 4 percent, and by program type as follows: Law students, 16 percent; Medicine and Dentistry students, 3 percent; Optometry students, 6 percent; and Veterinary students, 10 percent.

Trends in graduate admissions data

Now that three years of comparable data are available, it is possible to look at changes from 1971 to 1973 (see Table 5). Masters degree program applications dropped 3,127 (down 12 percent); masters degree acceptances dropped 2,525 (down 15 percent); and actual enrollees in masters programs dropped 321 (down only 4 percent). Doctoral degree program applications rose 319 (up 3 percent); doctoral degree acceptances rose 313 (up 7 percent); but actual enrollees in doctoral programs dropped 28 (down 1 percent). First-professional degree program applications rose 9,792 (up 61

percent); first-professional degree acceptances rose 748 (up 54 percent); and actual enrollees rose 249 (up 30 percent). Similar trends can be observed in Table 5 for individual campuses.

Additional graduate enrollment information

If official graduate enrollment data is required, it is available from the Central Staff Office of Institutional Research. We also urge you to check the last page of this report for a complete list of reports published by this office. Copies are available at the campus library of all institutions under the program of the State University of New York.
